TREMCO[®]
ROOFING & BUILDING MAINTENANCE

metal

Tremco Roofing offers a variety of waterproofing and rustproofing coating systems to restore and extend the life of your metal roof system. Our coatings

- ELIMINATE LEAKS
- REDUCE ENERGY COSTS
- STOP RUST AND CORROSION
- RESTORE YOUR ROOF TO ITS ORIGINAL BEAUTY

ROOF PROBLEMS

FREE ROOF INSPECTIONS

Before a product or system can be selected or even recommended, your roof system needs to be completely inspected to determine its condition and problems. Tremco Roofing offers no-obligation roof inspections necessary to provide you with the most beneficial solution to your particular roofing need.

Your metal roof inspection will cover two main areas — the surface condition of the roof panels and the details such as seams, fasteners, skylights and roof top equipment, since these areas are where most leaks begin.

Solutions

Tremco Roofing offers several options for restoring your metal

roof system, from our signature aluminum roof coating,

Alumanation 301, which is perfect for protection against water

infiltration, rust and deterioration of metal panels to our acrylic

Solargard that fits when a watertight white or colored roof is desired.

Whichever product you choose for your building's roofing needs,

Tremco, an ISO 9001: 2008 certified company, provides the strictest

quality controls to ensure product consistency and performance.

STRESS-FREE APPLICATION

Throughout the United States and Canada, Tremco Roofing works with a select group of contractors who are highly trained and experienced in installing all products. Your Tremco Roofing representative can provide you with names of contractors in your area, taking the guesswork out of selecting a quality contractor.

LONG-TERM PERFORMANCE

Tremco Roofing's restoration systems offer a variety of warranties to ensure the performance of your metal roof coating system. For all material and labor warranted coating projects, job site inspections are conducted to ensure that your system will provide you with years of quality service life.

SOLARGARD

Acrylic Roof Coating System

Solargard white acrylic roof coating options provide reflectivity and waterproofing in spray or roller applications. ENERGY STAR® rated and VOC compliant, Solargard acrylic roof coatings are offered in a variety of colors, with material and labor warranties available.

Solargard Hy-Build

- Fibrated formula bridges small gaps
- Excellent sag resistance on sloped substrates
- One-coat application reduces installation costs
- 40-year performance history
- Reflective surface reduces energy use

Solargard 6083

- Excellent resistance to weathering
- High elongation; low temperature flexibility
- Excellent aged performance values
- Formulated to meet and/or exceed ASTM D-6083

Solargard Acrylic Color Options

Low VOC, quick drying, single component, water-based acrylic coatings provide industrial performance for exterior metal surfaces.

- Low odor, environmentally friendly
- Available in architectural colors for improved aesthetics
- Provides dark color options to existing Solargard acrylic coatings

ALUMANATION 301

Aluminum Roof Coating System

A fibrated, aluminum coating that waterproofs and rustproofs in a one-coat application.

- Most economical solution
- Provides rustproofing
- One-coat application
- No primer is needed
- 15% metallic content for high reflectivity
- Material and labor warranties available

SEAM SEALER

By simply adding Seam Sealer, an elastomeric seam treatment, to metal seams, fasteners and roof penetrations prior to coating it with either Solargard or Alumanation 301, your roof will be waterproof. This seam treatment provides the necessary reinforcement to your metal roof system to allow for the expanding and contracting inherent in metal roofs. Coupled with a monolithic layer of Solargard or Alumanation 301, your roof will be watertight for years to come.

We provide products and services for roof and wall restoration under the brand names of ALPHAGUARD®, ALUMANATION® 301, ECOLASTIC®, GEOGARD®, ICE, ROCK-IT®, SOLARGARD®, and TREMLASTIC®. Our products offer long-term performance and energy savings to ensure that customers have the right solution to meet their specific restoration needs. Tremco has been a leader in the roof coating and restoration industry since 1928.

Tremco Roofing offers restoration solutions for:

- Built-Up Roofs/Modified Bitumen Roofs
- Weathered Single Ply Roofs
- Metal Roofs
- Foam Roofs
- Concrete Roofs
- Walls

TREMCO RESTORATION SYSTEMS SUPPORT SUSTAINABILITY

Restoring roofs has been at the forefront of our philosophy for over 80 years. This positions our reflective roof surfaces to help today's customers meet their sustainability goals by extending the life cycles of buildings worldwide while helping lower energy usage.

Tremco Roofing's restoration systems help meet sustainability goals because:

- They prolong the service life of structures for years
- Coatings are cost-effective over a second roofing layer, complying with building codes and postponing replacement for years
- There's no tear off, which eliminates landfill issues and fees and does not disrupt building occupants
- Reflectivity reduces energy consumption, the strain on HVAC systems, and a building's carbon footprint
- The Urban Heat Island Index is lowered, benefitting everyone
