

# TremView<sup>SM</sup>

## Rooftop Construction Camera Keeps Eyes on Your Job 24/7

When keeping an eye on your roofing and construction projects is important, but you can't be there every minute of every day, consider a job site monitoring camera from WTI, the construction services affiliate of Tremco Roofing and Building Maintenance.

TremView<sup>SM</sup> provides everything you need to personally monitor your roofing and construction projects and manage progress in real time, wherever you are. Designed to provide you peace of mind, while giving you an easy tool to improve communications and project management capabilities, TremView is an extension of WTI's quality assurance program.

Each TremView provides:

- High-resolution images taken every 12 minutes by an OxBlue<sup>®</sup> camera to capture every aspect of the job site.
- A project dashboard to proactively manage your job site from any location and from any internet-enabled device.
- Online tools to stay updated on the project's progress and weather conditions, including computer, tablet and smart phone app.
- Option to have a professionally edited time-lapse video available upon completion to document the entire project.

### TremView<sup>SM</sup> Plus

For roofing projects that require additional quality assurance, TremView Plus includes WTI's Job Site Inspection services.

WTI's Job Site Inspection services include:

Scope of work confirmation

Specification compliance

Supervision of proper materials application

Problem-solving

Project documentation & field reports
