Roofing Sustainability Seminars – First Notification (e-mail)

You are cordially invited to be our guest at one of our two Roofing Sustainability Seminars: Spruce Meadows on Tuesday May 6th and Northlands Agricom on Thursday May 8th.

The Seminars promise to be energetic, interactive and educational events. Those invited to attend include roofing design professionals; architects; specifiers; and facilities management administrators from healthcare, education, government and commercial property management across Alberta.

Roofing in Alberta has never been as complex and challenging as it is today. With so many different solutions to choose from, first cost, unfortunately, is often the determining factor even though there are countless solutions which prove life cycle costing is a more economical and sustainable solution for the building owner and society as a whole. The Seminars will focus on the numerous short-term and long-term problems facing building professionals and the sustainable solutions available to combat these issues.

Guest speakers include Gord Rajewski from A.D. Williams Engineering; and Scott Wylie from Wytech Building Envelope Solutions. The Seminars will qualify for Alberta Association of Architects and Roofing Consultants Institute learning credits.

Seminar:	Roofing Sustainability – Calgary	Roofing Sustainability - Edmonton
Date:	May 6 th , 2008	May 8 th , 2008
Time:	7:45 am – 4:00 pm	7:45 am – 4:00 pm
Venue:	Spruce Meadows	Northlands Agricom
Hall:	Congress Hall	Salon 1

Karen O'Neill is our Seminar Coordinator. Register early via e-mail at tremcoseminar@tremcoinc.com. As a follow-up to this notification, a formal invitation with the agenda will be sent to your office in the next two weeks. We look forward to seeing you.

Sincerely,

Derek Semeniuk
