**Tremco Roofing and Building Maintenance
Introduces TremLock® T-238 Metal Roofing System
System Offers Contractors Numerous Advantages**

BEACHWOOD, Ohio (May 1, 2013) -- Tremco Roofing and Building Maintenance is proud to announce the addition of the TremLock® T-238 metal roofing system to the company's popular TremLock line of metal roofing solutions. The TremLock T-238 system provides roofing contractors with an excellent option for a wide variety of roofing applications and customer needs.

"The TremLock T-238 system is ideal for retrofit or new construction on a broad range of substrate applications, including open-framing, with slopes as low as ½:12," said Tremco Roofing's Technical Product Manager for TremLock Metal Roof Systems Michael Steele, LEED Green Associate and Registered Roof Observer (RRO).

"Each panel is a symmetrical, two piece mechanically seamed standing seam roof panel with a 2 3/8" seam height consisting of a metal panel and seam cap. The seam is in the form of a 'T' with two beads of continuous factory applied sealant located on the seam cap. Once installed, this two piece design provides a continuous, uninterrupted seal at the top of the seam.

"Installation is clean and simple for contractors," Steele continued. "Panels can be installed from either side of the building, or even start from the center of the roof. The panel's symmetrical shape allows clips to be pre-installed to reduce labor time. Costs are lowered, the installation can be completed faster, and the customer has a longer lasting roof."

Like all TremLock metal roofing systems, the TremLock T-238 system is pre-engineered to provide the perfect fit for leak-free protection and long term performance, eliminating water infiltration and ensuring a watertight system for customers. Should a TremLock T-238 panel be damaged somehow, contractors can easily replace individual panels, a significant benefit over many other metal roofing systems.

The TremLock T-238 system has a Class A Fire Rating, meets numerous ASTM-E standards, and holds multiple UL and FM Global ratings. Tremco Roofing stands behind the TremLock T-238 Roof system with a 20 year weathertight warranty and a 20 year high performance paint film warranty.

About Tremco Roofing and Building Maintenance

Headquartered in Beachwood, Ohio, Tremco Roofing and Building Maintenance helps manage building life cycles for customers in education, healthcare, government, manufacturing and many other industries. In business since 1928, Tremco Roofing and Building Maintenance is a division of Tremco Incorporated, which is itself part of the RPM Building Solutions Group, an international leader in the construction, maintenance and repair markets. Tremco Roofing works closely with Tremco Incorporated subsidiary WTI, which provides general contracting and roofing services. Both Tremco Roofing and WTI are ISO 9001:2000 certified.
