Description of necessary first-aid measures					
Inhalation:	Move to fresh air.				
Skin Contact:	Wash skin thoroughly with soap and water. Get medical attention if symptoms occur.				
Eye contact:	Immediately flush with plenty of water for at least 15 minutes. If easy to do, remove contact lenses. Get medical attention.				
Ingestion:	Call a POISON CENTER/doctor if you feel unwell. Rinse mouth.				
Personal Protection for First- aid Responders:	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Symptoms:	May cause skin and eye irritation.				
Hazards:	No data available.				
Indication of immediate medica	al attention and special treatment needed				
Treatment:	Symptoms may be delayed.				
5. Fire-fighting measures					
General Fire Hazards:	No unusual fire or explosion hazards noted.				
Suitable (and unsuitable) extin	guishing media				
Suitable extinguishing media:	Use fire-extinguishing media appropriate for surrounding materials.				
Unsuitable extinguishing media:	Do not use water jet as an extinguisher, as this will spread the fire.				

Specific hazards arising from the chemical:	During fire, gases hazardous to health may be formed.

Accidental release measures:	In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations.
Methods and material for containment and cleaning up:	Dam and absorb spillages with sand, earth or other non-combustible material. Collect spillage in containers, seal securely and deliver for disposal according to local regulations.
Environmental Precautions:	Do not contaminate water sources or sewer. Prevent further leakage or spillage if safe to do so. Avoid release to the environment.
7. Handling and storage	
Handling	
Technical measures (e.g. Local and general ventilation):	Observe good industrial hygiene practices. Observe occupational exposure limits and minimize the risk of inhalation of vapors and mist. Mechanical ventilation or local exhaust ventilation may be required.
Safe handling advice:	Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.Do not handle until all safety precautions have been read and understood. Obtain special instructions before use. Inhalable crystalline silica is listed by IARC as a group I carcinogen (lung) based on sufficient evidence in occupationally exposed humans and sufficient evidence in animals. Crystalline silica is also listed by the NTP as a known human carcinogen. Constituents may also contain asbestiform or non-asbestiform tremolite or other silicates as impurities, and above de minimis exposure to these impurities in inhalable form may be carcinogenic or cause other serious lung problems.
