## Standing Seam Metal Roof System

### FEATURES

Versatile  
  
Span

### BENEFITS

- Multi-use roof and wall panel
- Can span open framing

### DESCRIPTION

TremLock "R" panel is a multi-use roof and wall panel used primarily in pre-engineered metal building applications.

### BASIC USES

TremLock "R" panel is an exposed roof and wall panel. TremLock "R" panel can be used as an exterior wall cover or roof panel, excellent for use on screen walls, equipment screens and parapet wall applications. A variety of fastener options are available to meet the needs of appearance and different substrate attachment. An optional purlin bearing leg (PBR) rests on purlins and provides support for fastening to the panel lap.

### SYSTEM DESIGN

TremLock "R" panels are designed 38 1/4" wide with a coverage of 36" and up to 40' in length with four major corrugations; 1 1/4" high 12" on center with two minor corrugations between each of the ribs, the entire length of panel.

### FINISH/COLOR

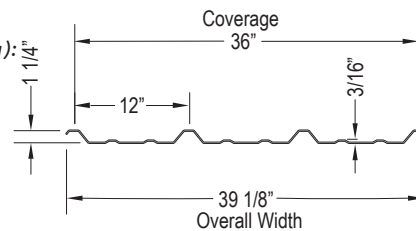

Acrylic Coated Galvalume®  
Fluoropolymer (Kynar 500® PVDF resin-based)  
Siliconized Polyester and Polyester  
Oil canning is inherent in all metal panels and is not cause for panel rejection.

### APPLICATION

TremLock "R" Plus panel is an exposed fastener wall / roof panel used on slopes down to 1:12. Tape sealant is required on seam (side-laps). Standard panel lengths up to 40'. Please inquire for longer lengths.
